

St Andrews C of E Primary School, Boothstown School Hall AV System

Background

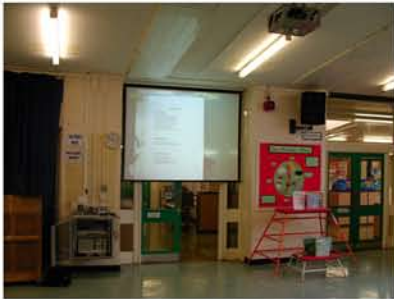

St Andrews is a Church of England Primary School in Worsley, Manchester. There are currently over 400 pupils of mixed gender attending the school aged between 3 and 11 years. This larger than average sized school serves an area of relatively high social advantage and low deprivation levels. This is a good school in which pupils achieve well.

SCHOOL HALL SOLUTION

3000 ansi lumen projector
2 metre electric screen
Pixie room control
Shure Wireless Mic system
Full hall audio

Security cabinet

Solution

A key factor in the success of this school is the visionary leadership of the recently appointed headteacher. Many parents comment on this favourably in words such as, 'he has been instrumental in injecting renewed enthusiasm into both staff and children making this already good school an even better and happier one.' (www.ofsted.gov.uk) This was evident to the Matrix North West Account Manager, Richard Hutchinson when he visited the school for a consultation. Mike Platt the schools Head Teacher knew exactly what he wanted from an AV solution. Matrix were recommended to St Andrews School by Salford LA. Salford have used Matrix for successful installations in the past and were happy to pass on their details knowing Matrix could provide reliable Whiteboards, Sound Systems and a School Hall Solution according to the specific requirements of Mr Platt.

"The representative was very efficient and the installation guys were also very helpful"

Mike Platt, Head Teacher

Outcome

The School Hall system adds another dimension to the schools learning environment. It Improves ICT provisions and access for the pupils, helping to maintain the above average standards of achievement at the school. The whole profile of the school is enhanced and the quality of presentation is greatly improved. Enjoyment of learning can be increased with interactive tools such as the Elmo Visualiser making lessons and activities more fun and interesting. With the Hall Solution an audience can be presented to more efficiently allowing even the people at the back of the room to see and hear exactly what is going on.

Following the installation Matrix carried out user training for the equipment, the school found this comprehensive and very helpful. The Head Teacher is so pleased with the installation that he has already recommended Matrix Education Solutions to other schools.
